### **Ajax Alarm System**

This system is connected through the internet hub or a T-p link can be installed for a charge of £30. A 2g sim card (for a monthly charge of £10) can be added as back up in case internet signal is lost. Hub is mains powered, if a fused spur is needed for installation, then one can be fitted for an additional charge of £50.00.

All sensors discussed on site visit will be fitted with wall plugs and screws to make sure a secure fitting is accomplished. Door and window contacts will be fitted using screws or sticky backs (client's choice on method) into or onto the PVC. The System's App will be installed and programmed on to as many phones as needed on site visit with a full tutorial on how to add more people to the system. The system will be fully programmed and a full demonstration on how the system works will be done at the end of installation.

### **Warranty**

All of the systems listed above come with a 2-year warranty, that will cover all equipment installed by JPS Security & Installations. If the Fault is caused by damage other than daily use, then the warranty will not be valid and the repair will be chargeable.

### **Any Questions**

If you have any questions about any of the systems or other options that you would like to know more about, then please do not hesitate to phone, text or email me and I will answer any and all questions to the best of my ability.
